DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7 March 2003 has been entered.

Claims 1-30 are herein examined on the merits in so far as they read on the elected compound specie and compounds 1, 3-5, 8, 10, 13-16 of Table I of the specification and rheumatoid arthritis.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Regan et al. (USPN 6,080,763).

Regan et al. (USPN 6,080,763) teaches a method of treating inflammatory disorders including the elected specie, rheumatoid arthritis, employing compounds of formula I (compounds of formula I encompass compounds 1, 3-5, 8, 10, 13-16 of table 1 (2-substituted-5-tert-butylpyrazolyl ureas) see cols. 6-19, see also claims 1-8.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ any of the compounds of formula I in a method of treating rheumatoid arthritis.

One of ordinary skill in the art would have been motivated to employ compounds 1, 3-5, 8, 10, 13-16 of table 1 (2-substituted-5-tert-butylpyrazolyl ureas) specifically in a method of treating rheumatoid arthritis because these compounds are known in the prior art to be useful in treating inflammatory diseases in general, and rheumatoid arthritis specifically.

This is a RCE of applicant's earlier Application No. 09/776,935. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
